PRESS RELEASE

Gilat Announces Sale of Spacenet Subsidiary

Managed Services Provider SageNet to Acquire Spacenet

Petah Tikva, Israel, 19th August, 2013 – Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced that it has entered into a definitive agreement to sell its Spacenet Inc. subsidiary to Tulsa, Oklahoma-based SageNet.

The aggregate consideration for the sale is approximately \$16 million, subject to certain post-closing adjustments and expenses. The transaction is subject to regulatory approval and the satisfaction of customary closing conditions and is expected to be completed within the next three (3) months. The transaction is expected to result in a capital loss of \$1 million to \$3 million, which includes banker's fees, legal fees and other transaction related expenses.

In fiscal 2012, Spacenet's business generated revenue of approximately \$77 million, approximately \$2 million operating loss and EBITDA of approximately \$2 million. Upon closing of the transaction, Gilat's management objectives for 2013 will be updated accordingly.

The sale of Spacenet, which currently operates as part of Gilat's Services Division, is expected to strengthen Gilat's strategic focus as a satellite communications technology company with innovative commercial and defense products and solutions for internet access and on-the-move applications.

As a long-term operator of Gilat products and solutions and with over 20 networks and over 100,000 VSATs currently supported, post-closing, Spacenet is expected to become a major customer for Gilat and to continue to offer services based on Gilat's products as part of the expanded organization's solutions portfolio. Spacenet customers should continue to receive the same quality of service to which they have become accustomed.

"The sale of Spacenet will allow us to better focus our assets and management attention on our core business strategy and strategic target markets," said Erez Antebi, CEO of Gilat Satellite Networks. "I look forward to the combined Spacenet and SageNet organization becoming an important customer and look forward to continuing to provide them products and solutions in support of the large enterprise customer base that they service."

For Spacenet, which has transitioned over the last few years from primarily a VSAT services company into a managed network services company, the acquisition will serve to increase its position and growth potential in the market. Since 1981, Spacenet Inc. has designed, implemented and managed some of the largest communications networks for US-based business, industrial and government customers and today manages communications at more than 160,000 locations for customers including many Fortune 500 companies and major government agencies.

“This is a marriage of two exceptional companies with the ideal combination of tools, technology and talent,” said SageNet President Daryl Woodard. “Both firms enjoy a proven track record for network services leadership and expertise, combined with company-wide commitments to customer service. We look forward to continuing to work closely with Gilat as we work to create North America’s premier Managed Network Services provider delivering the fastest, most reliable and secure network coverage available, at the lowest total cost of ownership possible.”

“It’s been a privilege to be part of the Gilat organization over the last 20 years,” said Spacenet CEO Glenn Katz. “We’re looking forward to both a new beginning with SageNet and to a lasting strong and mutually beneficial relationship with Gilat. We believe this is a great fit at the right time that will provide added value not only for our organizations, but more importantly, for our customers.”

###

About Gilat

Gilat Satellite Networks Ltd (Nasdaq:GILT) (TASE:GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in the United States, Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
