Gilat Expands Military Customer Portfolio with Southeast Asian Navy Contract

- Contract marks the third military branch in the country to have selected Gilat as a preferred vendor for satellite-based communications -

Petah Tikva, Israel, 18 December, 2012 -- Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced it was selected by a Southeast Asian Navy to upgrade its ground operations with IP-based satellite communications system.

As part of the contract, Gilat will deliver redundant SkyEdge II hubs, RF transmission capability and VSAT terminals that offer increased bandwidth efficiency throughout the Navy units. The increased bandwidth will allow enhanced connectivity to the Internet, video and other high-speed, broadband services while also enabling strategic military communications on board the Navy's mobile vehicles.

Gilat already supplies satellite communication solutions to the country's Air Force and Central Command.

"Gilat's SkyEdge II solution was selected for its advanced bandwidth utilization capabilities, a crucial commodity for any navy operating on limited and restrictive allocation of bandwidth resources," said Stephane Palomba, Regional VP for Asia, Gilat. "The IP-based terminals will reduce expensive dial-up lease costs while equipping the Navy with affordable and highly efficient access to a broader range of communication applications enhancing their operational readiness."

Gilat is a veteran supplier of maritime and ground satellite based communication systems for military organizations around the globe. Its SkyEdge II system is designed and optimized for broadband communications via satellite supporting data, VoIP and video applications - an excellent solution for broadband IP networks with high-speed inbound requirements.

About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in the United States, Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
