Gilat Announces Extension of Service Agreements with Colombian Ministry of Information Technology and Communications

- *The extended service agreements are valued at approximately \$16 million -*

Petah Tikva, Israel, 3 January, 2012 -- Gilat Satellite Networks Ltd. (NASDAQ: GILT) today announced that the Colombian Ministry of Information Technology and Communications, through the "Fondo de Tecnologías de la Información y las Comunicaciones", has extended its Social Telecommunications Program ("Compartel") agreements for the provision of services under the Rural Communitarian Telephony (TRC I and TRC II) and Telecentros (TLC 3) projects for an additional nine-months period, through 30 September, 2012. The extended service agreements are valued at approximately \$16 million.

The Compartel service agreements are for projects that provide telephony and Internet access to remote communities throughout rural Colombia. The current extension of the agreements covers approximately 1,800 sites, benefiting over 4 million inhabitants residing in these rural areas with limited or no access to basic telecommunications services.

These sites include telephony centers, small community internet access telecenters, known locally as CACI (Centro Acceso Comunitario a Internet) sites, and larger telecenters. The telecenters and CACI sites are equipped with computers, printers, scanners, faxes and webcams - all provided by Gilat. The telecenters and a majority of the CACI sites also include telephony services.

"This latest extension represents a strong vote of confidence in Gilat, and we are honored to be able to play a key role in the Colombian Government's goal to ensure that Colombian citizens are connected and informed, especially those residing in the most remote regions of the country," said Danny Fridman, CEO Gilat Colombia and Gilat Peru.

The extension follows the recent announcement by Gilat that it was selected by the Colombian Ministry of Information Technology and Telecommunication (MINTIC) to provide broadband Internet connectivity to over 1,600 schools throughout the country's rural regions. The project, also hosted by Compartel, is valued at approximately \$18.5 million.
