

Gilat's innovative ESA technology for commercial, business, government and defense aviation enhances the global flying experience

www.gilat.com

Chosen to deliver the highest possible bandwidth over LEO constellation

Gilat's innovative ESA technology for commercial, business, government and defense aviation enhances the global flying experience

Next-generation ESA solutions from the aero leaders in IFC modems and SSPAs

Gilat's innovative ESA technology for commercial, business, government and defense aviation enhances the global flying experience

Honeywell
ANUVU

Proven technology for
multi-orbit operations on Ka
or Ku bands

Gilat's innovative ESA
technology for commercial,
business, government and
defense aviation enhances the
global flying experience

**Industry-leading, compact
low-profile terminal with best
efficiency and performance**

Gilat's innovative ESA
technology for commercial,
business, government and
defense aviation enhances the
global flying experience

Continuous high-speed global coverage, supporting bandwidth-intensive applications and services

Gilat's innovative ESA technology for commercial, business, government and defense aviation enhances the global flying experience

Reliable and ruggedized, built to address aviation quality standards

Gilat's innovative ESA technology for commercial, business, government and defense aviation enhances the global flying experience

Proven inflight by Airbus Defense and Space as part of the European Commission Horizon 2020 initiative

Gilat's innovative ESA technology for commercial, business, government and defense aviation enhances the global flying experience
