

## Press Release

### **Gilat Awarded Over \$5 Million Order from the US Department of Defense**

*Gilat to provide baseband equipment to enable complete turnkey satellite  
communication architecture*

**Petah Tikva, Israel, April 3, 2024** — Gilat Satellite Networks Ltd. (NASDAQ, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, announced today that the US Department of Defense awarded over \$5 million for baseband equipment to one of the company's US-based subsidiaries, DataPath.

The baseband networking solution will be used with the company's DKET 3421 terminals, which are transportable satcom hubs that deliver the operational flexibility, capacity, connectivity, and control required to ensure success anywhere in the world. By supplying the baseband equipment, the company is completing the customer's ability to field a completed, turnkey satellite communications architecture.

"This order reflects the confidence and trust placed in the company to deliver communications solutions that meet even the most stringent performance requirements," said Barry W. Botts, Vice President, Sales and Business Development for DataPath. "We remain steadfast in our mission to deliver best-in-class solutions to the challenging requirements of our customers."

#### **About Gilat**

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we create and deliver deep technology solutions for satellite, ground,

and new space connectivity and provide comprehensive, secure end-to-end solutions and services for mission-critical operations, powered by our innovative technology. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Our portfolio includes a diverse offering to deliver high-value solutions for multiple orbit constellations with very high throughput satellites (VHTS) and software-defined satellites (SDS). Our offering is comprised of a cloud-based platform and high-performance satellite terminals; high-performance Satellite On-the-Move (SOTM) antennas; highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense, field services, network management software, and cybersecurity services.

Gilat's comprehensive offering supports multiple applications with a full portfolio of products and tailored solutions to address key applications including broadband access, mobility, cellular backhaul, enterprise, defense, aerospace, broadcast, government, and critical infrastructure clients all while meeting the most stringent service level requirements.
