

Press Release

Gilat Announces the Addition of SCPC Offering to the SkyEdge IV Aquarius Pro Modem

Specially designed software-defined, multi-orbit satellite modem, supporting up to 750Mbps per direction for maritime, cellular and enterprise applications

Petah Tikva, Israel, August 12, 2024 —Gilat Satellite Networks Ltd. (NASDAQ, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, announced today that their next-generation SkyEdge IV Aquarius modem now supports SCPC mode.

The SkyEdge IV Aquarius Pro modem offers ultra-high performance over next-generation VHTS GEO and NGSO constellations. It is the ideal solution for ultra-high throughput trunks, up to 750Mbps per direction, for a wide range of fixed and mobility applications including broadband, 4G and 5G backhauling, commercial maritime and cruise ships, and corporate enterprise services.

As part of a SkyEdge IV Network, the SkyEdge IV Aquarius Pro SCPC mode is designed to provide uninterrupted service, supporting next-generation software-defined satellites. It enables seamless operation, “make before break” NGSO satellites handover, switching between GEO and NGSO or between different GEO satellites.

“The Aquarius Pro is the first-to-market, GEO-MEO modem. It provides unique features such as DVB S2X with VLSNR, MEF L2 and unique RF combining capabilities,” said **Gil Elizov, Vice President, Products**. “The addition of an SCPC offering along with TDMA and Elastix SCPC makes SkyEdge IV the most flexible system in the marketplace for any application.”

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we create and deliver deep technology solutions for satellite, ground, and new space connectivity and provide comprehensive, secure end-to-end solutions and services for mission-critical operations, powered by our innovative technology. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Our portfolio includes a diverse offering to deliver high-value solutions for multiple orbit constellations with very high throughput satellites (VHTS) and software-defined satellites (SDS). Our offering is comprised of a cloud-based platform and high-performance satellite terminals; high-performance Satellite On-the-Move (SOTM) antennas; highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense, field services, network management software, and cybersecurity services.

Gilat’s comprehensive offering supports multiple applications with a full portfolio of products and tailored solutions to address key applications including broadband access, mobility, cellular backhaul, enterprise, defense, aerospace, broadcast, government, and critical infrastructure clients all while meeting the most stringent service level requirements.
