

Gilat Receives Over \$3 Million in Orders to Support LEO Constellations

Orders reinforce Gilat's position as a key provider of high-performance RF solutions for NGSO networks

Petah Tikva, Israel, January 13, 2025 — Gilat Satellite Networks Ltd. (Nasdaq: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, today announced orders exceeding \$3 million from leading service providers for Gilat's Gateway Solid State Power Amplifiers (SSPAs) to support Low Earth Orbit (LEO) constellations. These orders are expected to be delivered in the coming 12 months.

Gilat's high-performance SSPAs are key components of the company's innovative product portfolio, offering exceptional efficiency, reliability, and performance. These latest orders underscore the industry's trust in Gilat's technology to meet the stringent requirements of LEO constellations, where high-power, lightweight, and energy-

efficient solutions are essential to deliver seamless connectivity and optimal performance in the most demanding environments.

“These orders highlight Gilat’s leadership in satellite communication innovation, enabling service providers to expand their capabilities and meet the growing demand for global connectivity,” said **Edgar Khachatryan, Gilat Wavestream President & General Manager** at Gilat. “With increasing adoption of LEO constellations, Gilat’s SSPAs are well-positioned to play a critical role in powering the next generation of satellite networks.”

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we create and deliver deep technology solutions for satellite, ground, and new space connectivity and provide comprehensive, secure end-to-end solutions and services for mission-critical operations, powered by our innovative technology. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Our portfolio includes a diverse offering to deliver high-value solutions for multiple orbit constellations with very high throughput satellites (VHTS) and software-defined satellites (SDS). Our offering is comprised of a cloud-based platform and high-performance satellite terminals; high-performance Satellite On-the-Move (SOTM) antennas; highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense, field services, network management software, and cybersecurity services.

Gilat’s comprehensive offering supports multiple applications with a full portfolio of products and tailored solutions to address key applications including broadband access, mobility, cellular backhaul, enterprise, defense, aerospace, broadcast, government, and critical infrastructure clients all while meeting the most stringent service level requirements.
