

Press Release

Gilat Launches Gilat Defense Division

A New Division to Meet Growing Global Demand for Mission-Critical SATCOM Solutions

Gilat Defense integrates technologies from Gilat, Gilat DataPath, Gilat Wavestream & Gilat Stellar Blu to deliver mission-critical defense solutions and services

Petah Tikva, Israel, February 18, 2025 — Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced the formation of its new Defense Division, a strategic move designed to target the increasing demand for government and defense SATCOM solutions. Gilad Landsberg has been appointed President of Gilat's Defense Division, bringing over 20 years of experience in the defense industry.

Gilat Defense provides secure, rapid-deployment SATCOM solutions tailored for military and HLS organizations, government agencies, and defense integrators, with a strong focus on supporting the U.S. Department of Defense (DoD) and allied forces worldwide. By unifying, under one umbrella, the expertise and technologies of Gilat, and the wholly-owned subsidiaries Gilat DataPath and Gilat Wavestream, the division delivers end-to-end solutions with multiple layers of communication redundancy, ensuring maximum operational availability. With a focus on innovation, the division

leverages advanced technologies and flexible business models, to adapt to evolving defense requirements. Trusted by the U.S. DoD, NATO and global defense forces, Gilat Defense's field-proven solutions offer secure, high-performance connectivity, delivering reliable, battle-tested performance in the toughest environments to meet the critical SATCOM needs of modern defense communications.

Gilat Defense will be showcasing its solutions at the upcoming Satellite 2025 show in Washington, D.C., next to the Gilat Booth #2511. Visitors to the booth will have the opportunity to see a range of cutting-edge defense SATCOM solutions, including the newly launched GLT 1500 terminal, DataPath 2.6m antenna solution for tactical terminals and the US made Aquarius DS Family of products including Aquarius Pro DS and Aquarius E DS which are both compliant with FAR 889 and future DFAR 5949 regulations.

"With the launch of Gilat's Defense Division, we are strengthening and enhancing our commitment to providing advanced SATCOM solutions that meet the evolving needs of modern defense operations," said **Gilad Landsberg, President of the Defense Division at Gilat Satellite Networks**. "By combining technological innovation with a deep understanding of defense requirements, we are ensuring that military and government organizations have access to secure, resilient, and high-performance connectivity for mission success."

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly-owned subsidiaries—Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu—we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a cloud-based platform and modems; high-performance satellite terminals; advanced Satellite On-the-Move (SOTM) antennas and ESAs; highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and

defense markets, field services, network management software, and cybersecurity services.

Gilat's products and tailored solutions support multiple applications including government and defense, IFC and mobility, broadband access, cellular backhaul, enterprise, aerospace, broadcast, and critical infrastructure clients all while meeting the most stringent service level requirements.
